

Sourcing Tour for German companies to Romania & Bulgaria

November 10th, 2026

No.	Company	Activity	Looking for
1	3-D.services GmbH	Mechanical Engineering, Automation, and Advanced Manufacturing company specializing in CNC machining, 3D printing, custom components, prototypes, small-series production, lightweight solutions, and tailored robotics and automation systems. Services include design and CAD support, special-purpose machinery, production cells, material handling solutions, and retrofit projects for industrial applications.	reliable Romanian manufacturing and supplier partners specializing in CNC machining, metal fabrication, welding, sheet metal processing, and assembly for the long-term production of custom parts and subassemblies. Particular interest is in companies with experience in precision components, custom-engineered parts, prototypes, and small- to medium-series production. The focus is on long-term cooperation, consistent quality, competitive pricing, and reliable delivery performance Requirements: CNC Milling, CNC Turning, Welding, Assembly Materials: Steel, Stainless Steel, Aluminum, Tool Steels, Engineering Plastics
2	ALD Vacuum Technologies GmbH	Special Machinery and Plant Engineering company specializing in vacuum technology solutions, including vacuum melting systems for metal processing and vacuum coating equipment for industrial applications. End customers are primarily industrial manufacturers requiring advanced thermal processing, surface treatment, and specialized production technologies.	metal fabrication and mechanical engineering partners for the custom production of steel and stainless steel components and assemblies. Required capabilities include welding (MIG, MAG, TIG), machining, and assembly of large components and assemblies with workpiece weights starting from 1 ton. Materials include steel, stainless steel, copper, and standard industrial components. ISO 9001 certification is required. Requirements: CNC Turning, CNC Milling, MIG/MAG/TIG Welding, Drilling Materials: Steel, Stainless Steel, Copper

3	BGE Elektrotechnik GmbH	Electrical Engineering and Cable Assembly company specializing in cable harnesses, coiled cables, medical technology applications, and assembly services.	manufacturing of cable harnesses, coiled cables, medical technology components, and various assemblies. Materials are supplied according to specification (housings, connectors, cables, and contacts). Required equipment includes crimping presses, cable cutting machines, cable marking/printing systems, and related assembly equipment. ISO 9000 ff certification is required Requirements: Cable Assembly, Crimping, Cable Cutting, Cable Printing
4	ECOPack-Folien GmbH	Plastic Processing and Distribution company specializing in packaging films, construction films, vapor barrier films, stretch films, shrink films, stretch tubing, and related plastic film solutions.	Looking for a film manufacturer with blown or cast film production, film printing, for packaging films, construction films, vapor barrier films, stretch films, shrink films, and stretch tubing. Required certifications and testing capabilities for shrinkage, elongation, and tear resistance. Requirements: Film Extrusion, Film Printing, Converting Materials: Polyethylene (PE) Films
5	Gyptech GmbH	Machinery and Plant Engineering company specializing in conveying and handling systems for production facilities in the gypsum board industry.	manufacturing partners specializing in conveying and handling technology for production systems of panel-based products. Products include roller, chain, and belt conveyors, stackers, grippers, and related handling equipment. Required capabilities include the production of components, assembly, and electrical wiring. Materials include steel, aluminum, and plastics. Required manufacturing capabilities include welding, turning, milling, bending, and final assembly. Requirements: Welding, CNC Turning, CNC Milling, Bending, Assembly

6	Krinner Schraubfundamente GmbH	Construction, Civil Engineering, Metal Processing, Renewable Energy, and Infrastructure company specializing in the development, manufacturing, and distribution of screw foundations, as well as engineering and consulting services for sustainable, fast, and resource-efficient foundation solutions for building, civil engineering, solar, infrastructure, and industrial applications.	metal fabrication partners for the production of steel products, laser-cut tubes, laser-cut components, and machine assemblies. Required capabilities include welding, laser cutting, bending, and assembly, with a primary focus on steel processing. EN 1090 EXC2 and/or EXC3 certification is required. Requirements: Laser Cutting, Welding, Bending, Assembly Materials: Steel
7	Metal Improvement Company, LLC	Surface Engineering company specializing in the finishing of customer-supplied components.	mechanical engineering partners serving Automotive OEMs and Tier 1 suppliers, with capabilities in the manufacturing of blasting systems, coating systems, steel structures, and special-purpose machinery. ISO 9001 certification is required. Requirements: Machinery Manufacturing, Welding, CNC Machining, Casting Materials: Steel
8	Müthing GmbH &Co. KG	Agricultural Machinery Trading and Manufacturing company specializing in the production and distribution of mulching equipment for professional applications in the agricultural and municipal sectors.	metal fabrication, welded assemblies, coating, final assembly, hydraulic assembly, and balancing of tubes up to 3.2 meters in length. Products include complete mulching equipment and welded assemblies. Required capabilities include laser cutting, press brake forming, welding, powder coating, balancing, and assembly. Requirements: Assembly, Laser Cutting, Welding, Powder Coating Materials: S355, S700 Steel

9	provita medical GmbH & Co. KG	Medical Technology company specializing in infusion stands, medical lighting systems, and wall- and ceiling-mounted rail systems for healthcare facilities, providing reliable equipment and infrastructure solutions for hospitals, clinics, and medical care environments.	manufacturers of turned and milled parts, sheet metal components, wire-bent parts, baskets, and welded assemblies. Preferred partners operate in metal and wire processing, laser cutting, and welding, with capabilities in CNC turning and milling, wire bending, laser cutting, and plasma cutting. Materials include aluminum, steel, stainless steel, and POM. The supplier should offer welding and chrome plating services. ISO 9001 certification is required. Requirements: CNC Turning, CNC Milling, Wire Bending, Laser Cutting Materials: Aluminum, Steel, Stainless Steel, POM
10	Robert Hofmann GmbH	Plastic Injection Molding and Assembly company specializing in injection-molded plastic parts, injection molds, assembly of subassemblies, machined metal and plastic components, metal 3D printing for prototypes and small-series production.	injection molds, injection-molded parts for series production and prototypes, as well as machined aluminum and steel components. Required capabilities include the production of injection-molded, milled, and turned parts, surface treatments, and assembly services. Materials include aluminum, steel, and various plastics. Required equipment includes milling machines, lathes, EDM machines, and injection molding machines. ISO 9001 certification is required; AS9100 certification is preferred. Requirements: Injection Molding, CNC Machining, Assembly Materials: Aluminum, Steel, Plastics
11	Schwarz Systems GmbH	Stainless Steel Tank, Pressure Vessel, Steel Construction, and Plant Engineering company specializing in metal parts for semiconductor applications.	pressure vessel manufacturing, stainless steel fabrication, and precision machining for the production of turned and milled parts, steel structures, and pressure vessels. Required capabilities include turning, milling, TIG and MAG welding, surface finishing, and stainless steel and steel processing. ISO 9001 certification is required. Requirements: CNC Turning, CNC Milling, Welding Materials: Stainless Steel, Steel

12	Stahlbau Maerz GmbH	Construction company specializing in steel construction and metal fabrication.	manufacturing partners primarily for the production of windows and doors, and secondarily for balconies, staircases, railings, support structures, and welded components. Required services include material sourcing, manufacturing, transportation, and on-site installation in Germany. Requirements: Steel Fabrication, Metal Fabrication, Welding, Assembly. EN 1090-2 EXC2 certification. Materials: steel, stainless steel, and aluminium.
13	Telschig GmbH	Industrial Equipment company serving the food, chemical, plastics, construction, and recycling industries, specializing in systems for opening and emptying bags.	Looking for plant engineering and manufacturing partners for the production of welded assemblies, turned parts, and milled components. Required capabilities include fabrication, welding, turning, and milling of steel and stainless steel components. Requirements: CNC Turning, CNC Milling, Welding Materials: Steel, Stainless Steel
14	TP BLau GmbH	Rubber and Plastics Solutions company serving the automotive, heavy industry, special vehicle, mechanical engineering, construction, and trades sectors. The company specializes in sealing solutions made from rubber and plastic materials, including customized combinations with aluminum, steel, frames, windows, cabin doors, and profiles, delivering tailored engineering solutions to meet specific customer requirements.	manufacturers specializing in extruded rubber and elastomer products, particularly edge protection profiles and edge sealing solutions. Required capabilities include in-house production and value-added processing such as cut-to-length parts, frames, and rings. Materials include EPDM, TPE, silicone, and PVC. ISO 9001 certification is required. Requirements: Rubber Extrusion with Metal Inserts, Converting Materials: EPDM, TPE, Silicone, PVC

15	WP Kemper GmbH	Machinery and Plant Engineering company specializing in equipment and machinery for the artisanal and industrial production of bakery products.	qualified manufacturing partners specializing in sheet metal processing, welded assemblies, machining, plastic injection molding, and control cabinet manufacturing. Products include laser-cut and bent parts, welded assemblies, housings, tubular frame structures, turned and milled components, and plastic injection-molded parts. Assembly capabilities are an advantage. Materials include steel, stainless steel, and engineering plastics. The focus is on long-term cooperation with reliable medium-sized manufacturers and suppliers of high-mix, low-volume components and assemblies. Requirements: Laser Cutting, Bending, Welding, CNC Turning, CNC Milling, Injection Molding, Assembly Materials: Steel, Stainless Steel, Engineering Plastics
