INFORMARTION:

German companies have recognized the significant opportunities Romania presents, not only due to its **strong manufacturing sector** but also its **growing potential in research and development (R&D)**. The country's strategic position, competitive costs, and skilled workforce make it an attractive destination for innovation-driven investments, offering a solid foundation for both production and cutting-edge technological advancements.

Recent and long-awaited developments in **transportation infrastructure**, along with substantial **public investments in digital, and green infrastructure**—partly financed by readily available EU funds—are creating new prospects for German businesses and makes the country an ideal destination for businesses looking to relocate operations closer to Europe.

Sustainable and **affordable energy, circular economy**, and **food supply** have been key topics recently, presenting new opportunities for cooperation. Romania, with its significant **gas reserves**, well-developed **renewable energy supply chains**, and a growing portfolio of energy projects, is well-positioned to attract investors and strengthen the competitiveness of the European industry. As a **regional leader in energy production and supply**, Romania plays a crucial role in achieving climate neutrality.

Romania's membership in NATO (since 2004), along with a significant role in **regional security**, and the **European Union (since 2007)** provide **a stable and secure framework for investors**. This favorable environment is further reinforced by Romania's accession to the **Schengen Area in 2025**. This development is enhancing the country's connectivity, streamline cross-border trade and mobility, and foster a more secure and reliable environment for investment. Businesses benefit today from seamless access to a broader European market, fostering increased collaboration and growth opportunities for German companies.

Romania's position as an emerging **hub for nearshoring**, accelerated by the actual global geopolitical shifts, has further enhanced it's position as an attractive investment destination.

Furthermore, Romania offers significant business opportunities within the framework of the EU's "Rearm Europe" defense program. This initiative brings increased investment in defense-related sectors and cybersecurity creating new prospects for German companies.

The Republic of Moldova presents also a growing and promising landscape for German investment, with strategic opportunities across multiple sectors, including **manufacturing, agriculture, and technology**. The **IT sector** is rapidly expanding, supported by a strong pool of young, tech-savvy professionals and government initiatives to foster innovation and digital transformation.

Beyond its agricultural strength, Moldova also holds significant promise in the renewable energy sector, particularly in biomass energy. Agricultural waste plays an important role in the production of biomass, which is increasingly being used for energy generation. Biomass not only provides a renewable source of energy but also supports the circular economy by transforming waste into valuable resources, creating a more sustainable and energy-efficient future both for Romania and the Republic of Moldova.

As the country continues to build closer ties with the European Union, the opportunities for international partnerships and growth in Moldova are expanding.

Join us in this mission! Strengthening Partnerships – Turning Challenges into Opportunities.

Objectives

- Addressing opportunities and promising cooperation areas;
- Consolidating the dialog and strengthening the cooperation
- Increasing the German footprint and the share of high gross value-added activities of German companies in Romania and the Rep. of Moldova

Target actors and audience

- High ranking Government representatives from Germany, Romania and Rep. of Moldova
- German, Romanian and Moldavian companies looking for new investment projects and locations, interested in sustainable business partnerships and new export markets

Format: Keynote speeches and moderated panel discussions, good room for networking

Conference language: English/ German, with simultaneous translation Romanian
